Summary: Proficient web developer specializing in **JavaScript, React.js, Next.js, Node.js**, and modern frameworks.

❖ **Portfolio Website:** Developed a personal portfolio website using **Next.js** and implemented a modern frontend design utilizing **Tailwind CSS**. The design features **futuristic elements** and includes various **custom components** such as **animated tooltips**, **background beams**, **gradient backgrounds**, **card hover effects**, **infinite scrolling** with **moving cards**, **MacBook scroll behaviour, moving borders**, **customized navigation menus**, **spotlight effects**, **sticky scroll reveals**, **wavy background elements, featured courses** or **projects display**, **custom footer section**, **hero section**, **instructor/team member section**, **navigation bar component, custom testimonial cards**, and a section highlighting reasons for choosing the services or products

---

❖ **Modern Web Website**: The provided code includes an **HTML** document, **CSS stylesheet**, and **JavaScript** file, contributing to a **modern web design**. Key features include structured HTML with semantic elements and essential meta tags for accessibility and SEO. The CSS styling resets default styles and customizes elements for a visually appealing, desktop-friendly layout, notably in sections like the hero and navigation bar. JavaScript **adds smooth scrolling and dynamic animations using libraries like GSAP** for **precise control**. **Innovative approaches**, such as **mouse-following effects**, enhance user experience.

❖ **Authentication From:** Developed a secure and scalable **login/registration** application using **Node.js**, **Express.js**, and **Passport.js**. Implemented robust security features including **bcrypt** password **hashing**, input validation, **JSON Web Tokens** for session management, and comprehensive **error handling**. Utilized Mongoose for efficient **MongoDB** database interaction.

❖ **Technical Skill:**

- **Language:** JavaScript, Java

- **Web Development:** CSS, DOM (Document Object Model) Manipulation, AJAX (Asynchronous JavaScript and XML), Async JS, APIs, Node.js, Mongoose, User Authentication and Authorization, Redux

- **Web Development Tools"** VScode, Postman, GitHub.

- **Frameworks:** Bootstrap, Tailwind, React.js, Next.js, Express.js

- **Database:** MongoDB

❖ **EDUCATION:**
- **Pratap College Amalner,**
- **Bachelor of Computer Applications | July 2019** to **July 2023**
